Text search without any class/subclass limitation.

~~search~~

searching for the idea of a defocussing disk. I may have been a little too narrow with this search

L Number	Hits	Search Text	DB	Time stamp

Another text search without any class/subclass limitations.
I tried to make this search less limiting by adding (blur\$4)
as a synonym with defocus\$4. This gave me some more
hits, but not many. The limiting term so far is "aperture".
